FLOOD: CAUSES AND INTENSITY

Ferozepur Districts almost badly affected by floods. There are basically three reasons for flood in the District.

(i) Causes

a) **Rise in river water** : There are numbers of villages in Ferozepur Tehsil which are situated within protection bandh. Discharge of more than 1.25 lacs. cusecs upstream Hussaniwala in sufficient inundate the area situated within protection bandh.

b) **Breach in Protection Bandh:** Breaches in protection bandhs have caused flood in Zira and Ferozepur Tehsil, Sub-Tehsil Makhu is very prone to flood on account of breach in protection bandhs. Any breach in protection bandh upstream Giddar Pindi Rail Cum Road Bridge would flood Makhu area.

(c) **Intensity of Floods:** The floods are classified into three categories depending on discharge and the area likely to be affected.

Discharge Upstream (lac cusecs)		
Type	Harike	Hussaniwala
Low	0.5-2.0	0.5-1.5
Medium	2.0-3.0	1.5-2.25
